The learner expectations for the elementary science program are linked to two main areas of skill emphasis: science inquiry and problem solving through technology. The skills developed in these two areas are related, but have a somewhat different focus. In science inquiry, the focus is on asking questions and finding answers based on evidence.

Conducting science experiments with plants is an easy way to incorporate hands-on experiences to your curriculum. Working with seeds and leaves can teach your students about much more than capillary action, germination, and photosynthesis. It can provide valuable lessons in caring for living things, collecting data, and using the scientific method.
