Cognitive apprenticeship is a theory that emphasizes the importance of the process in which a master of a skill teaches that skill to an apprentice.. Constructivist approaches to human learning have led to the development of the theory of cognitive apprenticeship. This theory accounts for the problem that masters of a skill often fail to take into account the implicit processes involved in ...

By using computers, teachers can challenge students to provide more of their own interpretation and to generate their own text, rather than simply perform rote drill-and-practice activities. For example, a teacher can show a photograph of two people interacting to a pair of students at the computer.
